GOVERNMENT OF PAKISTAN
APRIL 2020**

EXECUTIVE SUMMARY

Pakistan has an ideal climate for cultivation of a variety of fruits. Thus an assortment of tropical, sub-tropical and temperate fruit are grown in the country. Different varieties of fruits are cultivated on an area of more than 0.74 million hectares with a total production of more than 6,96 million tones. In 2018-19, fruits export of 1.60 million tons and in 2019-20 it is, 1.80 million ton, an increase of 13 percent as compared to last year. Pakistan fruits are in high demand globally, mainly dates, mangoes, guavas, strawberries (and other berries), citrus, bananas, apricots, etc

Major vegetables grown in the country are potato, onion, chilies, tomato, turnip, carrot, cauliflower, peas and gourd which cover 78% of the total area and vegetables accounting 81% of total production. Potato has the major share in area and production which is 30.2% and 40 & respectively, followed by onion with receptive share of 21.2% and 21.4%. Total area and production of vegetables including potato in 22018-19 is 0.46 million hectors and 8.37 million ton. In 2018-19, vegetable export was 1.02% million ton while in 2019-20, it is 8.80 million ton an increase of 16.1 percent as compared to last year.

Horticulture, a major contributes to the agriculture export sector of Pakistan, is unfortunately much neglected. Citrus, mangoes, potatoes, onions, apricot, cherries and cabbages are the primary export items from Pakistan and are highly recognizable all over the world. Since the low production of internationally favorites fruits like banana, apple, orange, grape and strawberry can hardly meet the demand of the domestic market, export opportunities have squeezed further. Horticulture sector contributes about 12 per cent to the national agriculture GDP, but its volume of exports remains relatively low.

There are many factors which will determine the future scope of horticulture in Pakistan. As we know that Pakistan is an agricultural country and we can hope that future scope of horticulture in Pakistan would be more and better. There are many problems with our today's horticultural world and there is a strong need to eradicate these issues for much better future world of horticulture.

Concluding the above facts, there is a dire need to bring a systemic change in our current agriculture practices. Adaptation of modern agricultural practices, export oriented cultivation of varieties, changing the trend of supply led production to demand driven agriculture, improving SPS (sanitary & phyto-sanitary) regime, encouraging value addition trends, catering international market demands and strengthening supply chain management will be some of the key areas which can anchor our horticulture industry in particular and agriculture in general in longer run.
